Mobile SMS – Boon to Enterprises of all Verticals – Facts & Figures

Mobile is an **individual's signature**. It is an identity of a person. A person always keeps the mobile with himself, wherever he goes. It is a tool which facilitates communication and transfers the information in any situation from one person to another. One can transfer the information from one mobile to another by various mediums like Voice, SMS, and MMS etc. Transferring the data (SMS) is a highly acceptable medium of passing the information. Today, India has more than **540 billion subscribers**. More than half of the world is mobile subscriber. Mobiles are no more used for calling and receiving the information. This is a "**MAGICAL TOOL or ALLADIN KA CHIRAG**" for the fast paced growing and evolving universe. Rubbing the Deepak/Chirag for Alladin allows genie's appearance who fulfills all his dreams in a moment; similarly, **clicking the mobile** fulfills the dreams of transferring the communication in highly stressed jam packed traffic to the right person at the right place and at the right time.

A report from **Gartner** confirms that mobile communication will fetch **\$212 billion revenue by 2013**, out of which **SMS alone** will bring **83% of all mobile messaging revenue**. This gives a wider picture that text messaging or data transfer or SMS (Short Message Service) is a great communication service from enterprise to customers, workforce, vendors, stakeholders or vice versa. The SMS service on mobile is an inbuilt service provided by the telecom operators. But messaging in bulk with web based software application is an innovative and customized service provided by VAS Telecom players. There is a defined chain for VAS Telecom players like – Content Writers, Aggregators, Software Developers, Technology Enablers, and Telecom Operators. **AcquireLogix** works as **Technology Enablers** i.e. acts as bridge between Telecom Operators and Aggregators. We develop **telecom software applications** which enable VAS (Value Added Services like Bulk Messaging) **fast, scalable, robust, reliable and secure**.

SME's of all Industry verticals like Retail, Real Estate, Media, Entertainment, Healthcare, Banking, Finance, Insurance, Hospitality, NGO's, IT/ITES, Manufacturing, BPO's, Recruitment and Management Consultants, Automotives, Education, Courier and Logistics etc. are using bulk messaging services and **reaching the target customers instantly** which generates leads and **takes the lead conversion ratio** to a peak level. The time and effort taken for marketing and sales is minimal by Bulk Messaging. The customers get the required information with comfort very easily. Broadcasting the shortcode a five digit number in print, media and web fetches information by **push and pull technology**. Indian Idol, Dance India Dance, Little Champs, **Big Boss** and other reality shows use SMS service and reach to the mass. **Mass communicates** via published shortcode number and sends the text message for their favorites. **Mobile advertising and campaigning for IPL season 1 and 2** brought **lot of sales to SME's** associated with them. What are these facts depicting? They are trying to **convey a message** that **Mobile Messaging – especially SMS in bulk acts as boon to SME's in various sectors**.

AcquireLogix with its **innovative solutions, products and services** distinct itself and stand as major VAS player in Bulk SMS, Mobile Advertising, SMS Campaign management because of its **zero error tolerance approach to quality and services**, globally.

AcquireLogix: Who We Are?

AcquireLogix is a **global telecom technology service provider**. We act as **technology enabler** who develops the software applications in telecom domain as **VAS (Value Added Services in SMS, MMS, Mobile Marketing etc.)** catering to the various types' of business needs of enterprises, corporate giants, end users in **B2B, B2C and B2E** model of all Industry verticals.

AcquireLogix is a **mobile messaging service provider**, offering powerful **SMS functionality** to operators, enterprises, aggregators, ISPs, and message resellers. Through partnerships with mobile operators the company has **unique, multiple points of access** with mobile telecom network, enabling it to offer a new level of quality in messaging services.

AcquireLogix expertise in telecom domain and excel in providing **end to end mobile messaging** services from *software application development* to **back end integration** to *hosting the solution* to providing **dedicated channel connectivity** to 24x7 technical support with **multiple GSM/CDMA/VOIP operators** in host of countries, **globally**.

AcquireLogix's *Domain Expertise, Quality development* using agile methodology and *24x7 technical supports* with quick problem resolutions distinguishes it from our competitors.

AcquireLogix: What we have?

AcquireLogix spectrum has range of services like *MMS (Mobile Messaging Services), IVR, USSD, voice and WAP telephony*. The experienced and multitalented team of professionals with fire to innovate new solutions in mobile telecommunication technology services is widening the spectrum range at a fast pace and bringing simple and ready to use solutions for *customers worldwide*.

AcquireLogix is a single point Service Stopper.

AL - Short code

Definition

AL - Short code is 5 digit number which uses both push and pull technology to send and receive the messages. Short code is short in length and easy to remember. The shortcode is unique to each operator at technology level. In this fast paced evolving era of communication and technology, shortcodes have proved a very successful medium to reach the customers easily anywhere and anytime and has smoothened and fastened the interaction between the customers and the corporate. Shortcode users have an advantage of giving a unique identity to the message by taking KEYWORDS. Keywords are the special characters (alphabets or numbers) chosen to give a unique name/identity to the message on shortcodes. For example: Television Voting for Reality TV Show in a Nation (Let it be India).

- **Media Interaction/Voting:** There are many reality TV Shows like : Big Boss, India's got Talent, Dance India Dance, Indian Idol, Sa Re Ga Ma Little Champs etc. These shows advertise the keywords and shortcodes in various media's like print, TV, Net, electronic etc. and attract huge votes from end users. The data collected on shortcodes is analysed at a fast speed with various parameters like geographic collection of votes, date and time etc. and based on the analysis Winner of the show is announced. Way of sending message: Type <MSG – NAME OF THE PARTICIPANT> send it to 5667747
- **Research/Polling:** The media, news channels broadcast the HOT QUESTION/Survey like "Who will be the winner in the elections in UP? Option a) Congress b) BJP c) Samajwadi Party d) any other. Way of sending the message: Type <Option a/b/c/d> and send it to 5667747
- **Corporate Contests/Feedback:** The corporate are getting lot of benefit by shortcode tool and launching their product based on the feedback of the customer and increasing the acceptance of the product in the market and increasing the Lead generation conversion ratio. Way of sending message: Type < MSG. Win 10% discount on the first come first basis purchase of New Ponds Face Cream (New Product) from XYZ Mall ABC store till 1st April, send the feedback after its use and win valuable prizes by 31st April> send your feedback to 5667747

Characteristics

1. Short & Crisp

As the name says, shortcode has taken the place of long telephone numbers. It is a five/ seven digit number which is country specific number provided by Telecom Operators to service providers for providing VAS (Value Added Services) telecom services. The Shortcode is used in mobile messaging world to deliver the message to the end user or from the end user with fast, reliable, scalable, secure and robust medium having modern analytical tools.

2. Shortcodes Types

There are two types of shortcodes – shared and dedicated shortcodes. Multiple clients may have multiple keywords on the shared shortcode number. This type of shortcode is high in demand. The dedicated shortcode is provided to the customer's demand for its dedicated usages. This is a little expensive but proves very useful for Big Corporate for giving a unique identity to the shortcode for themselves and their large need.

3. Easy Remembrance and Reach

The shortcode is short in length and hence it is very easy to remember instead of long telephone numbers. The end user can interact from anywhere, at anytime with ease and comfort.

4. Identity in Mobile Communication Ecosystem

The mobile communication ecosystem has lot of communication chains and communication web. The shortcode provides you a unique identity in the mobile communication ecosystem so that end user/customer takes quick action on your quick and easy recognition.

5. Auto Response Messages

The customer gets an auto welcome message. One also gets the facilitation of customization the welcome message. Besides welcome message, the customer gets the auto response on the messages sent which completes the communication loop from sender to the receiver. Hence, there is no scope of the mistake in message sent to the right person.

6. Web Based Admin Control Panel

The depth of technical know how and expertise in telecom domain led to a very fast, scalable, robust, reliable and secure web based control panel with multiple features designed proactively with customers requirement. The agile software development of the web based

admin panel gives an opportunity for customized development of the admin panel for the customers.

Each keyword owner gets the facility to use the admin panel to fetch the various kinds of reports, configuring, customizing, scheduling or managing the messages as per their requirement.

7. Comprehensive Web based Real Time Reporting

The customers get the detailed reports with all parameters. One can track the responses received on short code date wise, time wise, geography wise and as per the need.

8. Revenue Sharing

One gets the opportunity to share the revenue on certain terms and conditions if the SMS volume per month crosses certain limit.

9. API Integration

We allow the integration of our services in your application.

Usage

1. **Media Interaction:** Advertise the shortcode with keyword on print, electronic, web, TV and keep the polling, voting, contests, bid, product launch as per the requirement and attract the volumes of SMS's. The quick analysis on the volumes of SMS's provides fast feedback on the product launch feedback and improvement required, announces the winner of the contests, bid etc.

2. Revolutionary Tool for all Industry Verticals

- **Educare:** attract and close admissions, parent feedback
- **Healthcare:** Launch the hospital and services in certain geography location
- **Retail:** Increase the acceptability of the product by receiving feedback and increase the lead generation conversion ratio
- **Automobiles:** Get the feedback from customers on vehicle service after service
- **Stock Broking:** The customers get the quick and relevant feedback on time

-
- **Banking:** The customers get the advantage of receiving the information on demand with ease anywhere.
 - **Courier and Logistics:** Trace your courier and logistics by getting the information on demand from shortcode advertised by the corporate
 - **Real Estate:** The customers may enquire about the map, location and other information via the advertised shortcode on fast mode.
 - **Insurance:** The customers may enquire and receive the urgent information on demand by them on the upcoming and existing insurance policies.
 - **Hospitality (Hotel & Restaurant) Industry:** The customers may enquire and get the information needed on hotel booking, confirmation, services and amenities and happy hours etc.
 - **Airline:** The advertised shortcode proves boon to customers when they need specific urgent information. It also increases the interaction with the customer and in turn takes the Value System to a peak for an airline industry in the competitive era.
 - **IT/ITES:** The advertised shortcode is highly advantageous for the internal workforce and external vendors, stakeholders for an immediate feedback and information on demand in knowledge based industry full of smart and technical people. They can lead if they lead in handling the information with internal or external stakeholders with respect to their competitors.

AL - Longcode Services

Definition

Longcode (LC) is a virtual 10 digit number. As the name “Virtual Number” clearly depicts, this number is available on the mobile network rather than on a handset. This number is integrated to the application. Since this is a 10 digit number hence called as Longcode number. Differences in Long Code and Short Code are as follows:

Long Code	Short Code
10 digit virtual number, hence called Long Code	5 digit number, hence called shortcode
It is not so easy to remember.	It is easy to remember.
Cross border interaction i.e. one can interact globally	Interaction is possible within borders i.e. within country only.
Long codes facilitate cross operator communication mechanism	Short Codes facilitate single operator communication mechanism.
Long codes facilitate communication via text (SMS's) and voice calls both.	Short Codes facilitates communication via text (SMS's) only.
Long code has standard price which is cheaper for a user.	Short Code has premium price which is little costlier than Long Codes
Used for voting/polling/contests/bids/product launches/customer feedbacks/campaigns/promotions in all industry verticals at international level. Messages are sent and received from one country to another.	Used for voting/polling/contests/bids/product launches/customer feedbacks/campaigns/promotions in all industry verticals at national level. Messages are sent and received from within the country only.
AcquireLogix's Long Code number is 9917166775	AcquireLogix's Short Code Number is 5667747

Long code functions with all the capabilities of the short code. To get the unique identity, one opts in for KEYWORD. Let's understand Long codes with an example:

- **Media Interaction/Voting/Contest:** One can see the "Abhishek Bachchan" in Oongli Cricket contest show. He is influencing the viewers of IPL cricket Match by advertising the Long Code number on television screen and positively pushing them to participate in Oongli Cricket Contest and win the prizes. The SMS's on the long code are very cheap. He is also attracting the international viewers of IPL Cricket match and indirectly generating lot of revenue for VAS market, telecom operators (national and international) and advertising the idea cellular services too. For viewers this is highly cheaper way to interact with the media and making IPL matches more interesting to watch.
- **Corporate:** International Product Launch: The corporate world has lot of advantage by advertising the long code on different media and collect feedback from all countries globally for product launch, campaign and promotions. This is cheaper and fast medium of advertising and marketing. One can get the shared or dedicated long code as per the requirement of the Corporate.
- **Research/Polling:** The Long codes are very useful medium of doing research on HOT question and collect the feedback and analyzing the same in quick fashion. The results of the poll too are broadcasted very fast. Example: Obama's selection as US President attracted lot of news channel to broadcast the hot question on his acceptability as President by various countries all over the world. The result again was broadcasted as per the polling feedback. Hence, Long Codes are revolutionary communication tool and compressing the globe to a local village because of fast, reliable and secure communication mechanisms.
- **International Communities** like WHO, UNESCO and many NGO's etc. gets lot of advantage in spreading international awareness like H1N1 epidemic disease shortly etc.

Characteristics

1. Long but Beneficial

Longcodes have brought revolution in communication technology world since it supports both text (SMS's) and Voice Call on the 10 digit virtual number in internationally.

2. Longcode Types

There are two types of Longcodes – shared and dedicated Longcodes. Multiple clients may have multiple keywords on the shared longcode number. The dedicated longcode is provided

to the customer's demand for its dedicated usages. This proves very useful for Giant Corporate for having its own unique identity via the longcode for their bulk need, globally.

3. Easy Global Reach

The end user can interact from anywhere, at anytime globally with ease and comfort.

4. Identity in Mobile Communication Ecosystem

The mobile communication ecosystem has lot of communication chains and communication web. The Longcode provides you a unique identity in the global mobile communication ecosystem so that end user/customer takes quick action on your quick and easy recognition.

5. Auto Response Messages

The customer gets an auto welcome message. One also gets the facilitation of customization of the welcome message. Besides welcome message, the customer gets the auto response on the messages sent which completes the communication loop from sender to the receiver. Hence, there is no scope of the mistake in message sent to the right person.

6. Web Based Admin Control Panel

The depth of technical know how and expertise in telecom domain led to a very fast, scalable, robust, reliable and secure web based control panel with multiple features designed proactively with customers requirement. The agile software development of the web based admin panel gives an opportunity for customized development of the admin panel for the customers.

Each keyword owner gets the facility to use the admin panel to fetch the various kinds of reports, configuring, customizing, scheduling or managing the messages as per their requirement.

7. Unlimited Secondary level Keywords

AcquireLogix provides unlimited secondary level keywords.

8. Comprehensive Web based Real Time Reporting

The customers get the detailed reports with all parameters. One can track the responses received on longcode date wise, time wise, geography wise and as per the need.

9. Revenue Sharing

One gets the opportunity to share the revenue on certain terms and conditions if the SMS volume per month crosses certain limit.

10. API Integration

We allow the integration of our services in your application.

Usage

1. **Media Interaction:** Advertise the longcode with keyword on print, electronic, web, TV and keep the polling, voting, contests, bid, product launch as per the requirement and attract the volumes of SMS's. The quick analysis on the volumes of SMS's provides fast feedback on the product launch feedback and improvement required, announces the winner of the contests, bid etc.
2. **Revolutionary Tool for all Industry Verticals**
 - **Global Educare:** attract and close admissions globally, Give and Take parent's feedback.
 - **Global Healthcare:** Launch the hospital and services, medicines, health awareness program from international bodies internationally.
 - **Retail:** Increase the acceptability of the product by receiving feedback and increase the lead generation conversion ratio, globally.
 - **Automobiles:** Get the feedback from customers on new vehicle launch globally.
 - **Global Stock Broking:** The customers get the quick and relevant feedback on time, internationally.
 - **Global Banking:** The customers get the advantage of receiving the information on demand with ease anywhere, globally.
 - **Courier and Logistics:** Trace your courier and logistics by getting the information on demand from longcode advertised by the corporate anywhere internationally.
 - **Real Estate:** The customers may enquire about the map, location and other information via the advertised longcode on fast mode, globally.
 - **Global Tourism (Hotel & Restaurant) Industry:** The customers may enquire and get the information needed on hotel booking, confirmation, services and amenities

and happy hours etc. from any country to any country – facilitate and bring comfort and ease in Global Tourism Industry.

- **International Airline:** The advertised longcode proves boon to customers when they need specific urgent information. It also increases the interaction with the customer and in turn takes the Value System to a peak for an International airline industry in the competitive era.
- **Global IT/ITES:** The advertised longcode is highly advantageous for the internal workforce and external vendors, stakeholders for an immediate feedback and information on demand in international knowledge based industry full of smart and technical people based at various locations globally. They can lead if they lead in handling the information with internal or external stakeholders with respect to their competitors.

AL - Web SMS

Definition

AL- Web SMS is a service which offers bulk SMS delivery to large volume of customers. In today's fast paced evolving communication technology era, our innovative and unique product provides web to mobile application interaction which multifold time increases the reach to our target customers globally in an effective and efficient way.

Characteristics & Advantages

1. Short, simple, fast, accurate and cost effective way of sending large volume of messages.
2. Create your own profile and sender ID – your identity.
3. Manage your contacts and group them in your own unique style to give an identity.
4. Send different messages to different users at time by Uploading the excel sheet.
5. Create your own SMS templates.
6. Schedule your messages with date and time facilitation.
7. Send messages worldwide.
8. Send flash, pic, business card, ringtone too.
9. 24x7 technical support.
10. Speed in services with zero tolerance to interruptions.
11. Regular high volume users get an advantage of dedicated SMS bandwidth.

12. 2 way messaging on “Reply numbers” enhance the feedback mechanism.
13. Comprehensive MIS with minutest detail.
14. Credit your account by paying online
15. Secure and confidential product for managing clientele database.
16. Promising product for increasing the arena of your customer reach and enhancing the ROI.

Usage

- m – commerce
- m – campaigner
- Make your customers active.
- Dormant customers can be made active by using the AL - Web SMS service.
- Send greetings and be personalized with your closed ones.
- Useful for all industry verticals.

AL Unicode SMS

Definition

AL- Unicode SMS service offers users to send text messages in Multilanguage’s. Users can also send special characters in text messages.

Characteristics & Advantages

1. Unique feature to send messages in different languages.
2. One interacts with the target customers globally in an easy understandable way.
3. One can target the region specific customers.
4. Usage of special characters gives personal touch to the message.
5. Get the MIS
6. Uninterrupted service

Usage

- Mass interaction with customers who can not understand English language.
- Personal touch to the message.
- Send bulk messages – in Multilanguage’s

AL - One 2 Many

Definition

This is one of the newest and most innovative features; AL - One 2 Many enables users to send SMS Text messages from their mobile handsets without visiting the website (no need of any internet connection).

Characteristics & Advantages

1. No need of internet connectivity.
2. Send the text message to large volumes from your mobile handset.
3. Send the message to the AL - Short code number. AL server will receive the message. The message will be sent to all the members of the group (created on the AL - Web SMS service account) instantly.
